

Manage All Invoice Payments in an Easier, More Cost-Effective Way While Adding a World-Class Virtual Card Program.

ConnectPay by Comdata is an integrated payables software that allows AP staff to make payments in a single payment run. Save time, reduce costs and generate rebates on spending — all without changing your existing processes.

Easily Execute All Payments at One Time

Make virtual card, check, and enhanced ACH payments in a single payment run from your existing accounting system.

Generate New Revenue with Rebates on Spending

Turn your payables into a revenue generating asset. Every payment delivered with a virtual credit card is eligible for money-back rebates.

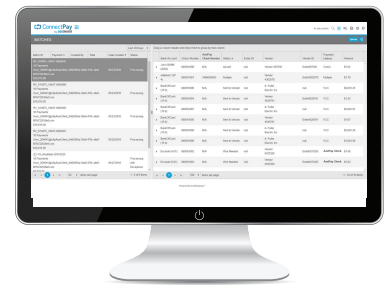

Further Reduce AP Costs

Pushing as many transactions to virtual credit card or enhanced ACH means even fewer checks, less fraud risk, and less printing and postage.

Greater Insight Into Payment Data

Because all of your payment data is consolidated in one central hub, you benefit from easier reporting and a full view of your expenses.

CONNECTPAY INTEGRATED PAYABLES

How ConnectPay Works

Execute all invoice payments in three easy steps.

Full Implementation and Program Management Support

Implementation and Setup

- A dedicated project management team will help you implement ConnectPay in as little as 15 business days, with virtually zero burden on your internal team.
- Technical resources work with you to lead IT integration with your existing accounting software.
- Hands-on training and documentation is provided for your staff.

Vendor Management and Enrollment

- Comdata's vendor network includes approximately 700,000 vendors who are already enrolled to receive virtual credit card payments via ConnectPay.
- Our in-house Vendor Enrollment team works with you to convert vendors to electronic payments.
